Summary

Bovin-desouza-v2.vercel.app
Full-stack/UX/Wordpress engineer

Work Experience

CutMy Ltd - 2022 - 2025

• Year 1

- Worked with Jira to understand business requirements, ticket generation, and helped estimate tickets for weekly sprint goals (Jira, Agile methodology).
- Improved home, category, and product pages through UX, following PM guidelines (SCSS, HTML).
- Programmatically added and removed product sets (PHP, Magento).
- Programmatically added new product attributes and customized them through Magento CMS.
- Collaborated in resolving a DYMO printer issue for production warehouses, which led to faster generation of material labels. (JS)
- Helped test the functionalities of printing during migration of Zebra to Dymo printers.
- Troubleshot minor and major anomalies for marketing/UX/Customer service teams and escalated when necessary.

• Year 2

- Improved Core Web Vitals through the reduction of image file sizes, lazy loading JS, and above-the-fold content with SCSS and code splitting.
- Built new features and systems oriented around company requirements.
- Took full responsibility for QA for all future ticket life cycles.
- Followed up on bugs from internal, external, systems, and plugins.
- Managed the QA Jira board, organising bug tickets based on severity vs priority.
- Provided weekly coverage for feature and regression testing before site deployments (sense check, unit, integration, E2E, API).

• Year 3

- Rebuilt cuttosize.co.uk to drive conversion to Cutmy.co.uk using Cursor and Claude AI and deployed it on AWS Amplify for quick application deployment.
- Added Mailtrap to Cuttosize.co.uk to capture all enquiries and redirect emails to the customer service team.
- Collaborated in developing a Kanban board microservice for the order processing system, improving visibility of product timeline and overall system performance (RESTful API, PostgreSQL, Supabase, React).
- Collaborated on adding automated testing for Magento when deploying tickets to the Jenkins pipeline (Magento unit, integration, Bugbug).

My current credentials
- 3 years of commercial full-stack development experience.
- 2 years of QA experience.
- 11 years of experience as a Duty Manager.
- Working knowledge of SEO and UX.
- Working knowledge of WordPress
